game is still garbage dont buy. I liked it, great music and visuals. Good job, team!. If you're thinking about getting, or even trying, a steam loco, get this one, it's a real gem. Really. Read the manual first, it will save you lot of time (even if you're already familiar with steam locos). And then practice practice practice. (P.S. I like all traction types, but steam has it's own magic you won't get with diesel or electric). I Miss PS Home :C

This made me feel good. Decent Hidden Object Game, short but esthetically pleasing. There are very few puzzles but the HO scenes are well done and there are 2 difficulty settings but no achievements. The story is not original (the girl who must save her people from an evil influence) but the player can gather ingredients to make voodoo dolls and potions to proceed and there are several locations to explore, unfortunately some backtracking is needed. Expert gamers will get bored quickly, but it may be a nice experience for beginners.. First thing: This game should be played with a Playstation/ Console controller. I understand with a PC release people expect every control surface to be available to them, but I find this series has a very notable exception. Ace Combat has had the same basic control scheme for over 20 years, with most games in the series being made for the PSX and PS2, originally being made with the PSX controller in mind. While using HOTAS or a mouse is desirable to some people, this is not how this game is designed to be played. It's a straightforward flight arcade game and you really don't need to reinvent the wheel here.

Apart from that, after over 10 years and one terrible mis-step of a game, the AC series is finally back to form. The original AC gameplay is still just as fresh as ever with the required superweapons, amazing soundtrack, and tunnel runs Ace Combat is known for. The cloud combat is not just a gimmick, and actually adds a spectacular layer that complements the original play style of earlier games.

For those familiar with the series, unfortunately, the depth of the game is really more comparable to AC04 and AC Zero, as opposed to the lengthy AC5 or the Japanese version of AC3. While it is excellent to finally get back into a proper Ace Combat game that isn't a decade old, portions do feel lacking. There are no ties to your wingmen, large operations aren't present (however a few missions do let you choose an AO to attack in the middle of gameplay) and the story does lack a bit of depth that could have been remedied with a few extra cutscenes or missions. While slightly disappointing, this really only amounts to a tiny blemish on a great return for the AC series.

Campaign aside, the multiplayer is fun, however limited. The servers are currently pretty well populated, but there are only just a handful of maps and only two modes (Team and Free for All). Hopefully this will be more thoroughly fleshed out in the future.

In short, get a PS3/PS4 controller, hook it up to your computer and play the game.. So, this is what Steam has become?

Allowing absolute trash onto the store. This game is one of the worst titles I have ever played on Steam. There is nothing about this that could be redeeming. I could see this being done in like 2 days with little experience.

Here is my video Impressions.... More enjoyable than the game IMO

<https://www.youtube.com/watch?v=Ccaxh6Ue1os>. This game is cancer ^ ^

Fun and sometimes mind bending puzzles, with awesome collectables that all 80s slasher fans will love.. I love the spitefire and i hope to find more WWII planes soon. With this technology, I can now have Hitler eating a banana as soon as my PC boots up.. Very,very good! All recommended!. Game aint bad for a runescape clone. It's a pretty flawed game, but not as broken and flawed as seans sexuality and political views. Sean should be burned alive. It's all fun and games until the seizures start. This game is basic, bright and hard. It's free, try it!. I dont recomand it !. UPDATE!! 6/12/15 I REFUNDED THIS GAME!

Please respect my opion.

So I checked this game out thinking wow, as a simulator nut freak this looks pretty cool.

How I was wrong.

I jumped into game with a 360 controller at first thinking "wow has control support nice" The controls on the controler were garbage and uncontrolable. I could barely move with it and only got to one checkpoint in the tut before losing energy and not be able to stop spinning. So I pretty much laughed the game off for awhile untill today, I came to the conclusion to try it again. We'll Let me point this out, The controls are a little better and controlable with a keyboard they're still a bit wacky. I almost finished the tut before running out of energy. I made up my mind to try a mission. I was doing great untill I realized the energy bar is sooooo stupid. It's like trying to keep a charge on a Ipod 1st Gen. The game is relaxing but needs quite a bit of help. If this game had like mechanics where your hands and stuff move or when you fix something you actually have a animation. Or even a bit more distinct way of finding the objectives.

*Pros.

*Pretty Decent Graphcs and Designs.

*Good Specs.

*Really cool voice clips from real space missions.

*Decent music.

*Gamepad support (HIGHLY UNRECOMMENDED)

*Cons.

*Terrible movement.

*Energy bar runs out WAY to fast.

* I'd like to do missions inside the cabin too.

*Once out of control with no energy you're done

*The two little boxes that display info are kinda tacky.

*No user menu interface. (Can't change video, Buttons, Sensitivity ETC)

Conclusion: I can't determine if this game is for you or not. I wish I could put my review as inbetween because it's negative and positive at the same time, One update is all this game needs and a couple of fixes and then I'll recommend the game. But until then No. This is a great HTC Vive experience. The game is complete with regular updates. The developers are very active, responding to the discussion board when people have problems. It's a great game to play, and a go-to when showing off the Vive as it's easy to pick up and doesn't scare people (you don't have to worry about people slamming the ceiling with your controller). It also doesn't take a lot of space for room scale, so if you're like me and have a small play area, this game is perfect. I feel it's well worth the \$20 asking price, especially when comparing to other VR games right now asking more for less.
